APPENDIX A
Capabilities List

APPENDIX A: Capability Listing

This list will be revised to add and delete items as the capabilities of the repair station change. As the need arises to add additional items to the capabilities list, the repair station will perform a self-evaluation as described in the Repair Station Manual, Section 10.

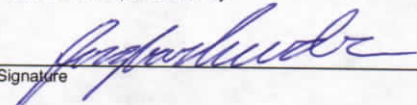

Each revision to this document shall be accomplished by providing a complete copy of this Appendix submitted electronically to the FAA and placed on the repair station intranet for access by all personnel. The added capability items shall appear with an asterisk (*) next to them.

No units or parts thereof will be released for return to service until the basic part number of the unit has completed the procedure of self evaluation and is approved to be listed on the Appendix A Capabilities list.
